

## **Salsgiver, Inc. Joins Allied Fiber's Dark Fiber Community**

**Freeport, PA, July 26, 2011** - [Salsgiver, Inc.](http://www.salsgiver.com) of Freeport, Pennsylvania announces it has joined [Allied Fiber's Dark Fiber Community](#). Hosted by Allied Fiber, the Dark Fiber Community is an online resource that brings together network operators, vendors, and industry experts in the interest of supporting communications network growth and development.

The Dark Fiber Community serves as a networking and educational center for those in the optical fiber networking industry. The community allows for easy exchange of information between industry leaders who are interested in eliminating obstacles for broadband access and in building new infrastructure for cutting-edge fiber optic networks.

"Allied Fiber welcomes Salsgiver to the Dark Fiber Community," states [Hunter Newby](#), CEO of Allied Fiber. "As a provider of lit services and fiber optic solutions, Salsgiver will bring a range of expertise to the community. The ability to continue to grow and add members who specialize in regional services provides many benefits for those who visit the Dark Fiber Community website as well as existing members. We look forward to this partnership with Salsgiver and the opportunities it will provide."

"We are honored to join the Dark Fiber Community," states Loren Salsgiver, CEO of Salsgiver, Inc. "We look forward to sharing our industry expertise in both dark and lit services within the Pennsylvania market to the many members and visitors of the Dark Fiber Community, as well as learning the latest technologies, services and applications others are deploying throughout the U.S."

Salsgiver, Inc. provides turnkey fiber construction, lit services, and dark fiber in Western Pennsylvania. Salsgiver, Inc. was established in 1995 and began providing fiber optic services in 2007. Salsgiver is a leading regional competitive communications provider offering a wide variety of fiber optic services. Numerous carriers rely on Salsgiver transport and construction services. Regional service providers, large, medium and small enterprises, schools, health care providers and local governments benefit from its rapidly growing fiber network. Salsgiver takes pride in being able to provide cutting edge fiber optic last mile service to residential, business and educational customers in typically underserved rural areas.

**About Allied Fiber**

Allied Fiber owns, builds and will operate its own network-neutral, fiber optic cable system, connecting sub-sea landing points, cell towers, data centers, carrier hotels, colocation huts, enterprise buildings, schools and governments with next generation, long-haul and short-haul dark fiber. This necessary dark fiber network, planned to unite along its route the continental United States, is created to address America's need for more broadband access, wireless backhaul, data center distribution and lower latency communications services. Allied Fiber is employing the most advanced fiber optic cables in its multi-duct dark fiber system to meet the ever increasing bandwidth demands for wireless, Video over IP and other advanced technologies thus enabling the development of the Global Broadband Economy for the United States.
